# TURNING PLANTS INTO MEDICINES

## NOVEL APPROACHES

**READERSHIP:** The book will be of value to students, researchers, faculty members and scientists relating to the field of medicinal plants, natural products, traditional medicines, Ethnopharmacology, chemistry, pharmaceutical sciences, extraction and formulation.

The objectives of the book is to highlight the relevance of traditional medicine and way towards ethnopharmacology, to share research achievements and innovations in herbal science, to evaluate and review opportunities for advancing herbal drug research in the region, to provide a platform to map an agenda for the development of phytomedicine, to address issues concerning conservation of medicinal plants.

The book has been compiled with 31 articles based on the original research work by eminent academicians and scientists of the country on different areas of phytomedicine. Recent trends and techniques involved from the search, documentation, processing, sustainable utilization and conservation of medicinal plants are the highlights of this book. It will provide a unique opportunity to boost up the knowledge in various aspects of medicinal plant research.

**Parimelazhgan Thangaraj**, is Associate Professor in the Department of Botany, School of Life Sciences, Bharathiar University, Coimbatore, Tamilnadu. He has worked as Scientist in DRDO, Govt. of India.
